

Maths

Children will continue to look the four operations and how this knowledge can be used to solve reasoning sums.

English

Children will explore non-fiction writing using J.K. Rowling's, 'Harry Potter and the Philosopher Stone' as a writing stimulus.

Music

Children will identify different structures in music and how we can organise different musical ideas.

Science

We will be identifying how sounds are made and how vibrations travel through different mediums to our ears.

PE

Children will be refining a range of athletic skills such as running, jumping and throwing.

Art

Children will be developing their colour mixing skills, focusing on tints and shades to create 3-D effects.

Computing

Children will be learning to send and receive e-mails safely and responsibly.

Crime and Punishment

French

Children will be learning how to present and describe their families in French.

PSHE

Children will look at relationships and how we can show love for special people and animals.

Year 4
Summer 1 - 2024

RE

Children will be able to retell religious events and people connected with Pentecost. We will be exploring the religious sacrament of reconciliation and the symbols used.

Design and Technology

Children will investigate and model frame structure to improve their stability. Using this research, the children will then design and create a stable, decorated pavilion.

History

Children will look at evidence from various sources of see how crime and punishment has developed over various time periods and influenced our society.
